Additional Customer Requests/Notes:

LTT customization is only compatible with factory Glock frames & slides; due to wide variations in materials & tolerances, all non-factory Glock frames or slides will be returned without customization.

* If you select the MOS Cut for you Glock, the rear sight will be forward of the MOS cut and is not compatible with an SRO Optic.

If you select a Direct Cut (footprint specific), this is a direct machining of the existing slide - it is not reversible and will only function with the family of optics that fit the specific footprint chosen. The rear sight will be behind the optic unless you specify otherwise. You can write on your form, direct mill with rear sight forward for all footprints. IF YOU SEND IN YOUR SLIDE and forget to write this in, we will not be able to change it. Aimpoint ACRO and Steiner MPS - the rear sight MUST be in front of the optic for direct cut slides.
